

Kapil Choudhari

Principal Frontend Architect | AI-Driven Systems & Agentic Workflows | Micro Frontends

+91-9833373353 | kapilrc@gmail.com | linkedin.com/in/kapilchoudhari | https://kapilrc.github.io Pune, India

Professional Summary

Visionary Technical Architect with 14+ years of experience leading Web & Platform Engineering, specializing in orchestrating enterprise-grade, high-performance applications and full-stack frontend architecture. Proven success in transforming the Software Development Lifecycle (SDLC) from passive code generation into fully autonomous execution. Expert in designing advanced agentic workflows that leverage custom LLM configurations, Model Context Protocol (MCP) servers, and continuous validation loops to radically accelerate delivery velocity while enforcing uncompromising enterprise quality constraints, strict security frameworks, and long-term platform maintainability.

Core Competencies & Technical Skills

Architectural Orchestration & Platforms: Monorepos, Micro Frontends (Module Federation), SSR/SPA Optimization, Scalable UI Infrastructure, Performance Engineering
Agentic Workflows & AI Automation: Custom AI Agent Design, Model Context Protocol (MCP) Server Integrations, Autonomous Multi-Step Validation Loops, AI-Assisted SDLC Acceleration
Frontend & Full-Stack Engineering: React, Next.js, Node.js, TypeScript, JavaScript (ES6+), Redux Toolkit, React Query, GraphQL, REST API Gateways
Enterprise Security & Identity: Auth Infrastructure, MSAL, Okta, NextAuth, OAuth/OIDC, JWT, Secure Token Exchange, Fine-Grained RBAC
Continuous Quality & DevOps: CI/CD Pipelines (Azure, AWS), Docker, SonarQube, Vitest, Jest, Playwright, Husky Pre-commits, Test-Driven Development (TDD)
Leadership & Engineering Culture: Technical Governance, Mentoring Cross-Functional Teams, Agile Scaling, Developer Experience (DX) Refinement

Professional Experience

- Tech Mahindra**
Principal Frontend Architect (Technical Architect)

Jul 2021 – Present
Pune, India

 - Lead solution discovery and technical estimation for multi-million-dollar RFP responses, ensuring high-accuracy project delivery.
 - Architected CI/CD pipelines on Azure and AWS, optimizing deployment throughput and system reliability for enterprise-grade React/Next.js applications.
 - Architect and deliver enterprise-grade React.js and Next.js applications using Micro Frontend patterns and Module Federation.
 - Define frontend architecture standards, coding guidelines, and reusable design/system patterns across teams.
 - Drive performance engineering for web applications through bundle optimization, rendering strategy, and API integration patterns.
 - Mentored 10+ engineers on best practices for React Query, TypeScript, and TDD, significantly improving code quality and team velocity.
- Senior Technical Lead (Jul 2021 – Dec 2023)**

 - Led React.js/Next.js implementation using TypeScript, Redux Toolkit, and React Query in Agile delivery cycles.
 - Managed cloud deployments and release pipelines across Azure App Service and AWS services.
 - Delivered integrations for payment and authentication systems while maintaining security and compliance requirements.
- Bruviti**
Technical Lead

Jan 2017 – Jul 2021
Pune, India

 - Led frontend engineering for scalable single-page applications with React, TypeScript, and Redux architecture.
 - Owned requirement analysis, technical design, sprint planning, and release coordination with cross-functional teams.
 - Improved maintainability through modular component design, shared libraries, and engineering best practices.
- Front End Developer (Jan 2017 – Mar 2018)**

 - Developed cross-platform web applications and integrated REST APIs for business-critical workflows.

Mobisoft Infotech

Aug 2015 – Jan 2017

*Full Stack Developer (On Briviti's Payroll, Bruviti hired me on it's payroll)**Pune, India*

- Built responsive web applications across React, Angular, and RequireJS-based stacks.
- Developed and integrated backend services and APIs to support end-to-end feature delivery.

IGATE (Capgemini)

Jun 2012 – Aug 2015

*UI Tech Lead / Sr. Software Engineer**Navi Mumbai, India*

- Progressed from Senior Software Engineer to UI Tech Lead, leading frontend delivery and mentoring team members.
- Implemented reusable UI components and improved front-end development standards.

Corporate Bridge Academy

Dec 2010 – Jun 2012

*Web/PHP Application Developer**Mumbai, India*

- Developed web applications and built foundational expertise in PHP, JavaScript and frontend engineering

Education

Bachelor of Engineering in Computer Science*Datta Meghe College of Engineering**Mumbai, India***Certifications**

Claude Code - Agentic coding | MS AI-900 | Google AI White Belt | Cloud Computing Fundamentals | edX: Node.js and React Cloud Applications | TypeScript with Modern React | Complete React Developer (Redux, Hooks, GraphQL) | React Query Certification

Awards & Recognition

Employee of the Year | Grand Salute Award | Star Awards | Team of the Quarter | Employee of the Month | Pat on Back Award
